Instruction for use of parts catalogue

- **This parts catalogue was prepared based on the latest information available as of December 10, 2001.**
- See the parts catalogue news for any revision that is made after December 10, 2001.
- **Always specify the part number when ordering a part.**
- Check the model, type, serial numbers, color, maker, and the size as needed before ordering a part.
- Note that the illustrations (part drawings) can differ from the actual parts in shape. They are given just to help you to refer to the parts.
- **When modifications or additions to this parts catalogue are made, a revised edition will be issued at an appropriate time, with successively progressing revision numbers on the cover. We recommend obtaining such revisions in order to keep your parts catalogue up-to-date at all times. To check whether a parts catalogue revision has been issued, please contact your Honda distributor.**

① Address number

- Address No. is provided (in place of the page No.) to help you refer to the part with the part No. or part name.

② Block title

③ Block number

④ Service item/Flat rate time

⑤ Reference number

- Title number marked with the parenthesis or parentheses indicates that it continues from the previous page.

⑥ Part number

⑦ Honda color code

⑧ Description

⑨ Assemblies

- Sections framed with broken lines in the exploded view drawings are available as complete assemblies. (Their individual parts can also be obtained.)

⑩ Color description

⑪ Note

- Notes are shown with the parentheses in the part name column.

⑫ Required quantity

- Required QTY shown in the parenthesis or parentheses indicates the optional part.
- Required QTY marked with "N" Indicates the optional part that should be selected as needed.
- Required QTY indicates the number of the part used in the block.

⑬ Serial number

⑭ Type

- When the type column is blank, it indicates that the part is applicable to all types.
- As the type of the actual unit may differ from the "parts catalogue, type" please refer to "Models, types and applicable serial numbers" for confirmation.

Fuel hose, general purpose hoses and vinyl hose

- The standard part fuel hose, general purpose hose and vinyl hose may be substituted by the coiled bulk part.
- When ordering the standard part fuel hose, general purpose hose and vinyl hose use the bulk part number written in the parts catalog in brackets () underneath the part name.
- When exchanging the hose, cut and use at the specified length as mentioned in the part name.
(For the method of cutting the bulk part, and method of filling out orders etc., please refer to the instructions issued with the bulk part.)

Bulk part number of fuel hose, general purpose hose and vinyl hose.

Example: 9 5 0 0 1 - 7 5 0 0 1 - 5 0 M

Bulk part number:
Refers to the bulk part.

Marking code (fuel hose and general purpose hose)

Change code (Vinyl hose)

Indicates number mark or change sequence, however, the code for the bulk part must be strictly 0 (zero).

Types of code:

5: General hose

Ⓢ **CAUTION: It is DANGEROUS to confuse the fuel hose with the general purpose hose or vinyl hose.**

Never use a general purpose hose or vinyl hose in place of a fuel hose or vice versa. Always use the correct bulk part in the parts catalogue, according to the service manual or the instructions issued with the bulk part.

How to use the flat rate time (F.R.T.)

This F.R.T. (Flat Rate Time) is used to determine the standard labor time allowed for replacement of parts covered by the warranty during the period the warranty is in effect. The F.R.T. for those parts which are not listed herein should be determined from the operation closely related to the replacement of that part.

1. The F.R.T. is based on the following servicing conditions

- a. A liberal allowance is added to the net servicing time.
- b. Standard times specified are based on the condition that the necessary servicing tools listed in the service manual which describes the Honda service policy are available close at hand and the work performed by a mechanic with normal skill.
- c. Time required for inspection and operational test following the servicing is included in the F.R.T.
- d. The F.R.T. for “•” marked parts are same as the F.R.T. for the representative part above.
- e. The F.R.T. shown with (*) includes engine removal and installation.

2. Method of computing

The job times are listed in tenth of an hour to simplify computation.

(Example) 0.3 = 18 minutes
5.6 = 5 hours and 36 minutes

CONVERSION CHART			
Hours	Minutes	Hours	Minutes
0.1	6	0.6	36
0.2	12	0.7	42
0.3	18	0.8	48
0.4	24	0.9	54
0.5	30	1.0	60

3. Computing the F.R.T.

The following are only examples and do not reflect the actual F.R.T. for this product.

When several jobs are performed at the same time, make the calculation in the following manner.

a. Jobs of non duplicated nature

The F.R.T. for the job is obtained by totalling the F.R.T. for each part replaced.

(Example) Replacement of head cover gasket and oil filter.

Service item	F.R.T.
Packing, cylinder head cover	0.5
Cartridge, oil filter	0.5

The F.R.T. for the job is: $0.5 + 0.5 = 1.0$

b. Jobs of duplicated nature

Take the F.R.T. for the last part to be replaced.

(Example) Replacement of piston and cylinder head gasket.

Service item	F.R.T.
Gasket comp., cylinder head	3.0
Piston	*5.0

The F.R.T. for the job is: 5.0

c. Jobs of partially related nature

Total up the F.R.T. for all of the parts replaced and then subtract the F.R.T. for the duplicated operation (i.e., cylinder head gasket service).

(Example) Replacement of valve and cylinder head.

Service item	F.R.T.
Valve	*3.0
Head assy., cylinder	*4.0
Gasket comp., cylinder head	*2.5

The F.R.T. for the job is: $(3.0 + 4.0) - 2.5 = 4.5$

- The F.R.T. shown with (*) includes engine removal and installation.
- The parts, having the same number of man-hour, are identified by a mark “*”, and classified under the title of their representative work.

4. Adjustment, cleaning

Item	Service item	F.R.T.
Adjustment	Valve clearance	0.5
	Carburetor	0.2
	Governor	0.2
Cleaning	Carburetor	0.6
	Air cleaner element	0.2
	Arrester spark	0.2
	Spark plug	0.1
